

# VISUAL ARTS

## SYLLABUS

The visual arts consist of creative expression that considers innovation and individuality as its primary determinants. Objects-of-art thus produced with great skill or accomplishment invariably gains a degree of invested value that is culturally significant, which is why visual art has also been known as fine arts. A range of disciplinary specialization in studio-practice has led to sub-categories like drawing, painting, sculpture, printmaking, design etc. which are also medium specific categories within practice. In contemporary times visual art has moved beyond the singular discipline towards multi-media expressions that have even significantly transgressed the studio and gallery/museum as spaces and the market as its economic determinant. Thus, it now includes and incorporates the applied arts within it, while photography and digital modes are integrated into its world of postmodern practice. On the theoretical perspective, art history and criticism examines and analyses the past and present developments and innovations, providing a contextual awareness to studio-practice about the present and possible future(s). This syllabus thus integrates all of the above into a holistic understanding of the discipline(s).
